

## Wastewater & Water Process Solutions

Innovative service and superior support meeting demands of evolving markets and new technologies.

### WHAT WE DO

Aquachem supplies functional polymers, coagulants, and other chemistries to assist Industrial/Municipal Water and Wastewater Treatment Plants improve their operating cost-efficiencies in critical liquid-solid separation processes. Including a full line of NSF-certified and approved for potable water treatment.

### ABOUT US

We provide the highest level of service and superior customer support while selling quality products at a great value. Our cost-effective solutions, experience, and superior focus on our customers' needs allow us to build long-term, mutual benefiting relationships with our customers.

## Whether it's Chemical Supply or Full Programming our Solutions Scale to Support Various Industries

Municipal/Industrial Water & Wastewater  
Cheese & Whey Manufacturing  
Food & Beverage

General Manufacturing:  
Metals, Plastic, Rubber  
Rendering & Recycling Plants:  
Beef, Poultry, Pork

Dredging & Mining  
Industrial Laundromats  
Energy

### PRODUCTS & SERVICES

From chemical programming and laboratory evaluations to equipment delivery and field service, we provide solutions for wastewater and water processing for a wide array of industries. Aquachem strives to meet the demands of the ever evolving markets we serve as well as innovate and develop new technologies to support these programs.

#### WATER/WASTEWATER TREATMENT

##### Flocculants

Emulsion  
Powder  
Solution  
Mannich-grade  
Cationic / Anionic  
NSF / PWG / GRAS

##### Coagulants

Organic Coagulants  
Polyamines  
Dadmac

##### Antiscalants

Dispersants  
Inhibitors

##### Defoamers

Oil based  
Water based

##### Equipment

Polymer breakdown units  
Chemical feed systems  
Monitoring & Control

##### Water / Wastewater Chemicals

Aluminum Sulfate  
Aluminum Chlorhydrate (ACH)  
Ammonium Removal  
Caustic Soda (Sodium Hydroxide)  
Citric Acid  
Clarification / Settling Aids  
Defoamer  
Ferric Chloride  
Ferric Sulfate  
Enzymes  
Membrane Filtration

Micro Nutrients  
Nitric Acid  
Odor Control  
PAC's  
Phosphorus Control  
Polymers  
Quat Neutralizer  
Sodium Bicarbonate  
Sodium Bisulfite  
Sodium Hypochlorite (Bleach)  
Toxicity Scavenger

For General Inquiries, Questions or Concerns, Please contact us at **920.687.5238**.

#### FIELD SUPPORT

Aquachem provides experienced field service personnel to support our products, provide customer training, assist in problem-solving, and to offer technical assistance.

Onsite system surveys

Operator Training

Ongoing service support
